

## Dummy Letter Of Support

For load and performance testing of the Sapphire system.

This PDF is expected to be between 1MB and 2MB in size, as a PDF.

FUNDING > FIND FUNDING > PARTNERSHIP PROJECTS

## Partnership Projects

This funding scheme provides funding and support to create new opportunities for researchers and policy makers to work together to define research questions, undertake research, interpret the findings and implement the findings into policy and practice.

Partnership Projects create partnerships among decision makers, policy makers, managers, clinicians and researchers. Partnership Projects answer a specific research question to influence health and well-being through changes in the delivery, organisation, funding and access to health services.

### Continuous application process

This scheme allows applicants to apply at any time during the year rather than through just one annual round. This is to allow researchers and partner organisations to develop timely collaborations. The grant commencement date is not fixed for 1 January—it will be aligned with the timing of each peer review cycle. This allows funding to be administered more quickly after grants are awarded provided all necessary documentation is in place.

### Peer Review Cycles

Applications will proceed to peer review depending on when they are submitted to NHMRC. For example, for an application to be peer reviewed in the first Peer Review Cycle (PRC 1); applicants must ensure minimum data requirements are met by 24 March 2021, and the application must be submitted by 7 April 2021. Applications that have met minimum data requirements but are not submitted by the application due date will remain active. The applicant may continue to work on the application and submit to the next available PRC.

Any application which was started but was not submitted by close of applications for PRC3, 1 December 2021, will need to reapply in 2022.

### NHMRC Administering Institutions Partner Waiver

NHMRC Approved Administering Institutions (Administering Institutions) cannot be named as a partner on a Partnership Project application, unless they:

- are an organisation which primarily delivers health policy and/or health services, and
- obtain a waiver from NHMRC.

This is consistent with the description and objectives of the scheme, which includes the aim to create partnerships among decision makers, policy makers, managers, clinicians and researchers to improve the translation of research evidence into health policy and health practice.
